1. This Office Action is the answer for a communication filed on 1/05/2004, and 3/29/2004 (the IDSs).
2. Claims 1-40 are pending in this application.

Drawing Objection(s)

4. Five sheets of formal drawings were filed. The drawings are objected to because there is no descriptive label or nothing to represent/provided for a specific process/method showed in claim 1 (i.e., a redirecting step). Corrected drawing sheets in compliance with 37 CFR 1.121 (d) are required in reply to the Office action to avoid abandonment of the applications. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121 (d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Information Disclosure Statement

5. Two IDSs were filed on 1/05/2004, and 3/29/2004; and they are considered by the examiner.

Claim Rejections - 35 USC 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. In a claims 10, there is no limitation – the claimed language only asserts a use of method claim 1 (i.e., “on a rail vehicle” is merely an intent of use such method).

Election/Restriction

8. Restriction to one of the following inventions is required under 35 U.S.C. § 121;

I. Claims 1-14, are drawn to a method comprising steps controlling speeds of a turbine engine, classified in US class 701, subclass 20.

II. Claims 15-40, are drawn to a physical system/product for controlling speeds of a turbine engine, classified in US class 60/239.

9. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as product and process of use said product. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process, – e.g., NASA utilizes a different process for control and monitoring speeds of its space vehicle’s turbine engines.

10. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR § 1.143)

Applicants are required under 35 U.S.C. 121 to elect a specific group for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable – according to the pending claimed language, no generic claim is seen to be patentable.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose telephone number is 571-272-6759 (email address: cuong.nguyen@uspto.gov). The examiner can normally be reached on 9:30 am - 5:30 pm.
